(54) METHOD AND DEVICE FOR CORRECTING DIGITAL PICTURE

(57)Abstract:

PROBLEM TO BE SOLVED: To provide simple and high efficient backlight processing.

SOLUTION: This invention is characterized in comprising a storage means for grouping a created look-up table into an approximate group based on the optimal result of backlight corrections of plural pictures and storing a luminance value at the bottom frequency part of the luminance histogram of the picture with the value related with the grouped look-up table, a means for deciding the luminance value at the bottom frequency part of the luminance histogram of an input picture, a means for deciding the stored look-up table corresponding to the luminance value at the bottom of the input picture, and a means for backlight-correcting of the input picture according to the decided look-up table.
